(54) Title: STACKABLE BOX WITH VERTICALLY MOVABLE HANDLES FUNCTIONING AS LOCKING MEANS

(57) Abstract: A coupling system for the coupling-together of several boxes arranged on top of each other is formed by sets of locking means which are arranged on the outer walls of the boxes. Each set of locking means has a vertically movable locking frame which is capable of engaging a resilient part in the form of a snap lock, which has a hook with a conical boxes are to be transported. The invention provides an extremely easy-to-use modular box system, each of which may be coupled by simple movement of two locking frames. Since, moreover, the locking frame serves as a handle, it is not necessary to provide additional handles on any of the boxes, which may thus be stacked and locked in a arbitrary order and be transported directly by means of the locking frame of the uppermost box, which, as mentioned, also serves as a handle. To make the modular box system additionally flexible, it is an advantage that the handle may also be used as a fixing part for objects, such as pipes, strips, work tables, etc.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/DK 02/00217

A. CLASSIFICATION OF SUBJECT MATTER

IPC7: B65D 21/032, B25H 3/02

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC7: B65D, B25H

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	WO 9619326 A1 (MADSEN, JENS, OLE), 27 June 1996 (27.06.96) --	1-8
A	EP 0444440 A1 (EGWA-WIVEDA), 4 Sept 1991 (04.09.91) --	1-8
A	DE 7244356 U1 (AESCULAP-WERKE AG VORMALS JETTER), 16 May 1974 (16.05.74) -- -----	1-8

☐ Further documents are listed in the continuation of Box C.☒ See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family

Date of the actual completion of the international search
